

MRS. NEWTON.

June Newton certainly proves the adage that behind every great man is a great woman. Her photographic career — under the pseudonym Alice Springs — may not have been as controversial as that of her husband, the late Helmut Newton, but her new book *Mrs. Newton* (Taschen) proves what a powerhouse she is. The book features both snapshots and professional portraits, and stars some of the creative world's greatest players, from Yves Saint Laurent to Nicole Kidman to Robert Mapplethorpe. Born June Browne in Melbourne, Springs has had an extraordinary life full of travel, fame and fortune, and *Mrs. Newton* offers a fascinating glimpse inside it.
