Ever wake up from a dream and think it was real? Or believe for a second that the music clip on Channel V is actually real life? Welcome to the surreal world of pop culture where fantasies come true. Thirty years ago, Nik Cohn – most famous for being the writer of the short story that became *Saturday Night Fever* – met artist Guy Peellaert and together they went on a fantastical rock odyssey and recreated the imaginary world of teenage bedrooms where rock'n'roll and R'n'B were like a secret society. Coffee-table book publisher Taschen has revived this classic homage to music legends. Included in the dream-like pages are drawings of The Rolling Stones, Jimi Hendrix, James Brown, Bob Dylan, The Beatles, Elvis and The Who. *Rock Dreams*, published by Taschen, RRP \$65, www.taschen.com
