ISBN 3822831255

Taschen have pulled out all the stops here, reproducing the first ever widely circulated atlas. Less a coffee table book, more an actual coffee table, this monumental tome, resplendent in exquisite maps and magnificent illustrations, is a feast for the eyes. Complete with an introduction by Peter Van der Krogt explaining the creation of the atlas during the 17th century, the *Atlas Maior* presents each of Blaeu's maps to a modern audience for the first time. The Italian maps in particular demand to be lingered over, as do the fascinatingly naïve takes on the new world. A book to be cherished for generations.
