

01 THE STANLEY KUBRICK ARCHIVES
 Castle, Alison (ED)
 Published by TASCHEN

It's not like I'm scared of little girls or anything. I think it's the fact that they are twins. Don't they creep you out, twins? I prefer triplets, though. Or maybe it's just the word that makes me hot, like they are immediately sexy just because they are triplets. But twins are just freaky. They even have their own magazine, www.twinsmagazine.com. Creeps me out. I believe it all comes from the scene in Stanley Kubrick's *The Shining* with the murdered twins standing hand in hand, saying, "Come play with us, Danny". I get serious shivers and goosebumps just thinking of this masterpiece of a movie. Talking about masterpieces, the Stanley Kubrick Archives is a great book both in size and content about an even greater, if not the greatest, director of all times. It's got everything. The backbreaking heavy book includes peaks behind the scenes, previously unpublished photographs from all of his movies, as well as stories from and about the productions. It also comes with a CD featuring a lengthy interview with the director. And to top it all off, books in the first print run will each include a twelve-frame film strip from a 70mm print of *2001: A Space Odyssey* owned by Stanley Kubrick. Dribble.

150 euro - Hardcover + CD + Booklet, 411 x 300 mm, 544 pages
