

FASHION NOW 2

Taschen

Fashion's grand family, between admiration and desire. This compilation of 160 designer portraits, taken systematically with photos, career paths and an interview of each person, reflects the image of a world made up of activity and sequins ! A sort of Who's Who in images, this succession of portraits from I-D, the famous British fashion magazine, offers a panorama of those making fashion today, from the most influential to the most emerging ! The work is also an essay to fashion's future: precarious celebrity, the rising importance of menswear... And as Karl Lagerfeld says: « There is only one rule : eyes open »!
