

Movie Magic

Taschen pride themselves on high-end coffee table books and their latest offering is no disappointment. Jurgen Muller's *Movies of the 30's* is the second in his series of film books chock full of images that will delight any movie buff. The book features such classics as Tod Browning's *Freaks*, Fritz Lang's *M* and Charlie Chaplin in *The Great Dictator*.

This book is a joy to flick through, filled to the brim with

excellent stills, a mixture of black

and white and colourized images. We look forward to Muller's guide to the 40s with bated breath.

Movies of the 30s is available now.
