

For those who foam at the mouth waiting for airmail to deliver their copies of *domus* from Italy, Taschen has a treat. *Domus 1928–1999* is a 12-volume, \$600 walk through the international design mag's history. Highlights from 71 years are ripped from past issues. Explore each style era—from art deco to functionalism, postwar to late modern—through of-the-moment accounts as they originally appeared, rather than just through the rear view. But context is part of the package, with introductions to each section that address the significance of the period.
