

Whether or not big breasts feature highly on your own erotic agenda, this lavishly illustrated book is a pleasure to browse. A whopping collection, literally, it also features long, detailed interviews with the likes of Uschi Digard, Kitten Natividad, Candy Samples, Tempest Storm and the official world record holder for biggest natural breasts, Norma Stitz.

While famously-augmented ladies such as Chesty Love are mentioned in passing, this is a celebration of the naturally stacked, beginning with the sweater girls and topless shots of the 50s and stopping short of the silicon madness that took over in the 80s. The photos are a mix of black and white and colour, with well-known, even iconic shots along with fascinating not-seen-for-decades curios.

Along with the varieties of lingerie and cosmetics that will intrigue any fashion fetishists out there, there's a fascination in the diversity of physical types portrayed. Yes, they're all busty but some are big all over, some the hourglass type, there are perky little nipples, huge saucer-sized areolae... Titties are great. Feast your eyes on this lot. **ZAK JANE KEIR**

A TRIP DOWN MAMMARY LANE
