

Pierre et Gilles, Double Je, \$50

Dreamy and daring, hyper-stylized and humorous, in the world of Pierre et Gilles pop culture mavens, geisha goddesses, burlesque babes and religious figures intermingle and create incomparable art in an alternate world. "Double Je," their latest collection, spans 30 years of the French collaborators' work and has been inspired by the likes of Iggy Pop, Catherine Deneuve and Madonna. The pair blends their artistic mediums to create the images: Pierre is the photographer, while Gilles paints and manipulates the images. With its striking, dreamlike imagery and lavender hues, the cover of the book inspires bold design. Prop it up on a contemporary console table in a light-filled foyer to draw focus to this attention-deserving book.
