Complete Works**

Michelangelo was a man of remarkable genius, and for the first time Taschen presents his oeuvre in its entirety, including his drawings, sculptures and architectural works. Enormous reproductions allow us to admire the muscular and sinuous forms of his sculptures, the monumentality of the The Last Judgement, his designs for St Peter's Basilica, and several other works. Frank Zöllner was also the author of the XL Taschen monograph on Leonardo, and this title will surely match its popularity. With high production and print qualities, this volume presents very good value at this price.
