Girls Alone

German artist Uwe Ommer is no stranger to shooting beautiful women. A fashion photographer since the 1960s, he shot the high-profile 1984 Pirelli calendar, having returned to photography that year after a lengthy absence. In his latest book, *Do It Yourself*, Ommer further celebrates his love of the female form, collecting a series of erotic portraits with a twist – he gave his subjects their own cameras to capture themselves as they chose to. It's a strange and original way to work. By taking himself out of the picture, Ommer aimed to expose the ways in which women genuinely view themselves. The resulting images blend exuberance and insecurity with a healthy dose of variety. RN
