

Book review **Architecture Now! 5**

Philip Jodidio

Taschen/October 2007

Code 62315/Paperback/576 pages/£24.99

The latest volume in this hugely popular series continues the trend of documenting the most exciting and innovative architectural projects of recent years from around the world. Works by established architects such as Zaha Hadid and Frank Gehry are featured alongside those of newer practitioners, highlighting the bright future of architecture. For the first time in the series there are also projects by designers and landscape architects, signifying the bonds that are developing amongst all those who are involved in the built environment. Each entry has a biography, colour photographs and information about the featured project. Lavishly illustrated with images and sketches throughout, **Architecture Now! 5** is a feast of inspiration and ideas.
