

## PHOTO FEETURE

'The most tempting part of a woman is her feet,' declares American glamour photographer Ed Fox. And in this lavish volume, he celebrates the female foot in his own distinctive style.

Fox admits to a fascination for women's feet since his teens: 'I was always going through men's magazines, hoping to see bare feet, but all the photographers would either keep the shoes on, or crop the feet out entirely, so I figured it was weird to like feet and didn't think anyone else was into it.' Until he discovered Leg Show magazine, that is. Shortly after submitting some photos to the mag in the late nineties, he was assigned a monthly gig to shoot the most beautiful feet in adult films. And today he is credited with introducing leg and foot photography into the mainstream.

'I don't have a foot fetish to the extent that I'm not interested in other parts of the body,' so while tantalising tootsies are central to many images here, they are presented as just one facet in a decidedly raunchy repertoire.

And as a bonus, supplied with the book is a DVD sampling some of his ventures into video which he describes as 'somewhere between art and porn'.
