There is nothing that can compete with inspiration as dreams can. Being a dreamer, or really, being a person that want to get the best out of my short life, I tend to dream a lot.

And having been invited by this book to further accomplishing my dreams is definitely true. As for taking a holiday in my living room, or really wanting something more on my next holiday, this is just one of those books that make me smile. As the title says, this is about seaside interiors. Beautiful homes that have one thing in common; they're all based near the ocean. From Norway to Italy, from Brazil to Puerto Rico, this is wonderfully presented with inviting pictures and lots of homes surrounded by nature to enjoy. It could be inspiration taken from the interiors of the various homes that are being presented here, or the ocean view you immediately get calm by looking at. I would say this is a fine book for many hours of relaxation and tranquillity for the busy mind. Richly illustrated throughout all pages, and this is a really thick book, and I'm sure we all need inspiration like this. Pages that comes with the breeze of the sea and waves of salt water going through our minds once in a while (yeah, I'm a dreamer). A perfect gift for someone you like. Perhaps yourself? LILLY
