ART NOW! VOLUME 2

Uta Grosenick

Taschen

£ 7.99

The art world can sometimes feel like a bit of a closed book, so an up to date overview of what's what and who's who is a must for bloggers and professionals alike. Following on from Art Now, this second edition catalogues over 135 of the most important players on the international art scene with biographies and exhibition histories, and traces topical and stylistic trend developments, noting in particular a return to figurative painting and an increase in political subject matter.
