Icelandic artist Olafur Eliasson likes breaking boundaries; his installations are just as much about architecture as about art. Publishers Taschen have now compiled a book of his works entitled Studio Olafur Eliasson: An Encyclopedia. The book is brimming with facts and inspirational images - a glorious potpourri of installations, photography, sculpture and architecture, all in alphabetical order. Last year Eliasson designed the Serpentine Pavilion in Hyde Park, London. Today, he's based in Berlin.

Studio Olafur Eliasson: An Encyclopedia will be published by Taschen this autumn.
