

## ASPIRATIONAL HOMES

Showing off some of the world's most innovative and exciting architecture, Taschen's latest publication gathers together an impressive array of bold homes. *Architecture Now: Houses* takes the reader on a global tour of some of the most remarkable builds created over the last five years, opening the doors of a clutch of cutting-edge homes. Detailing each project rather than providing practical advice or tips on self-building, this book is about architectural

appreciation, pure and simple.

Architecture Now: Houses (Taschen, £24.99) by Philip Jodidio, is out now.
