

### Another Big Step for Mankind

Put Norman Mailer's writing into a book of spectacular photography from the archives of NASA, LIFE magazine and many other sources, and you've got a true milestone from one of mankind's greatest achievements-Apollo 11's moon landing in the summer of 1969. Meet Moonfire, the latest release from specialty book publisher Taschen. Each copy includes a Plexiglas-framed, numbered, ready-to-hang, archival-quality photographic print signed by Buzz Aldrin. Commemorative of the year of man's first step on the moon, only 1969 copies will be published. Of that total, a dozen very special editions will include a piece of moon rock. Get all the information at [Taschen.com](http://Taschen.com) or call 49.22.120.1800.
