

LUNAR LEGEND

THE BOOK THAT BRINGS YOU SO CLOSE TO THE MOON, YOU CAN ACTUALLY TOUCH IT

■ On May 25, 1961, President John F. Kennedy announced the ambitious goal of sending a man to the Moon. Eight years, 400,000 engineers and scientists, and \$24 billion later, Americans landed on the lunar surface. *Moonshot* captures the most spectacular photography of the journey from the Earth to the Moon. It also includes the epic Norman Mailer non-fiction story that appeared in *Life* magazine at the time of the landing. A limited edition version is accompanied by a genuine piece of moon rock. You may never become an astronaut—this is the next best thing.

Prices vary, based on the size of the moon rock; taschen.com
