

Los Angeles, Portrait of a City edited by Jim Heimann

Los Angeles is a fable-made manifest, a city of dreams that has grown in fewer than 100 years into a global cultural colossus. In over 500 pages, *Portrait of a City* brings you images of some of the dreams upon which LA was built, from old photos of makeshift movie studios, to drive-ins and beaches, to celebrities like the young Jackson 5, and of course, to the ubiquitous backyard swimming pools. A challenging project for any city, but a portrait of such a diverse, confusing and ever-changing environment as Los Angeles is as nostalgically sweet as a dream that for many has not yet been realized but still holds a morsel of hope.
