

PRE-FABULOUS!

Prefabricated homes have almost risen to cult status, so much so that Taschen has dedicated a book to the topic – *Prefab Houses*. So, what's happening locally? Nordic Homes is standing out from the crowd with a growing architect following. We hear the attraction is the ability to create a bespoke finish of eco-friendly elements and aesthetics. The company has developed various options, from dollar-savvy designs for farmers (from \$108,500) to higher end homes for holiday or everyday abodes (up to \$327,000). According to Nordic's Julie-Ann Ford, people are buying blocks of land down south and choosing to put on one of Nordic's homes as an interim to building the dream home. Due to this, the company will provide 'real estate' space on its website to help onsell these transportable houses. *Nordic Homes* (08) 9437 9309, nordichomes.com.au. Also check out *Bachkit* (08) 9384 7589, bachkit.com.au.
