

MEN ONLY CHECKS OUT A BOOK THAT KICKS THE FOUR SEX IN THE CITY HARPIES FIRMLY INTO TOUCH...

# URBAN MISS

**U**rban Girls? It doesn't really convey much to your average UK reader, does it? Still, it seems that in America the phenomenon is a bit more recognisable – or at least it certainly should be, following this publication from Taschen ([www.taschen.com](http://www.taschen.com), £27.99).

Photographer Howard Huang's clearly got a bit of a fixation with big-bottomed babes, and in this collection he's produced an absolutely stunning collection of images of more or less Amazonian beauties sporting little more than skimpy bikinis. In fact it turns out one of his major influences is Japanese Anime, and there's definitely a cartoonish element to a lot of these pictures. The girls, without exception, are almost impossible glamorous and desirable, with an airbrushed sheen that lends them an air of unreality. Couple this with sets that feature crackling lightning, guns, money, cars and bikes – not to mention jungles, savannahs, deserts and nightclubs and you'll see that Huang really is more interested in fantasy than reality. And the bums! We all like a nicely turned posterior, and many of the samples here are of almost gravity defying proportions! Perfect coffee table fodder for the bling-lovin' arse man!
