

## i-Spy

Over the past three decades *i-D* magazine has collaborated with some of professional photography's greatest names to push creative boundaries and get us thinking. The magazine started life in 1980 as a fanzine documenting street style and has evolved into a glossy magazine that still cuts a dash in the publishing industry and nurtures new talent. A new book from Taschen, *i-D Covers 1980-2010*, celebrates 30 years of covers from the magazine and features memorable images from Nick Knight, Corinne Day and Tesh, among many others.

The founder was Terry Jones, former art director at British *Vogue*, who showcased emerging talent both in front of and behind the lens. The magazine is credited with launching the careers of Knight, Wolfgang Tillmans and Juergen Teller, to name but a few. The magazine continues to work with big names as well as up-and-coming talent, and Jones remains the creative force behind the title. This book is edited by him, alongside fashion editor-at-large Edward Enninful and fashion journalist Richard Buckley.

***i-D Covers 1980-2010*, edited by Terry Jones, Edward Enninful and Richard Buckley, Taschen, £27.99. ISBN: 978-3-8365-2157-4
