As curator of the masterful FWA site, Rob Ford knows a thing or two about what makes a beautifully constructed website. Here he draws on his years of experience – not to mention millions of page views – in sieving thorough the DNA of good web design.

A mixture of showcase examples, case studies and basic analysis, this title lacks in practical content. But it's the ideas that it generates for great portfolio design and the examples on show that make this a release that all web designers should read.
