

This book is the Alec Baldwin to the Holiday Gift Guide's SNL. It's appeared on more Guides than any other item. I just can't help but link to it every year. When I first listed it the book was \$200 and well worth every penny. You get amazing photos and details about every single one of Kubrick's films as well as an in-depth exploration of Kubrick's creative process. Now it's down to under \$50 and every year when I'm doing research I inevitably stumble across it and add it again to my list of cool-ass books for you movie nerds out there. \$44.10.

Speaking of previously ridiculously expensive Kubrick, I've got another one for you. A couple years ago this book was available in a limited edition that included access to a server that had thousands of reference photos personally collected by Kubrick. It cost some \$600. Now you can just get the book for less than a tenth of that. And by "just" I mean you get a 1100+ page 10 pound hardback book that includes Stanley's unmade Napoleon script in its entirety, personal correspondence and quite a few of those thousands of personally collected reference photos and location scout pics. You just don't get the server access and the nifty book-within-a-book extras of the limited edition. However you get everything else, the real meat and potatoes. This item is in the top 5 best things on the guide. \$40.93.
