

App a Week

'Alice For The iPad'

Category: Promotional

For use on:

- iPhone
- iPad
- Video Demonstration

Alice For The iPad

This apparently is a glimpse into the future of digital reading and one of the most impressive E Books out there so far...

This little number is a clever take on Lewis Carrol's original Book 'Alice in Wonder Land' but gives you the chance to interact till the cows come home. A lot of new illustrations were added and some of the original illustrations (some of them up to 145 years old) were scanned but don't let that put you off. Up to date tech was added like virtual gravity and physics which allows you to interact with the characters and objects on screen.

It's a scream - if your the type that gets bored after 15 minutes of just reading... it's time to shake the Pad!

Quote by Oprah Winfrey:

"It's going to change the way the kids learn"

On the screen.

Collaboration: Rad Dad Collective have hooked up with Taschen Publishing to bring you an 'App a Week.' The inspiration came when we received a copy of *The App & Mobile Case Study Book* from Taschen and we were well impressed!
