

# Book Review “Movies of the 2000s”

Author: Jurgen Muller

Paperback: 640 pages

Publisher: Taschen

Release Date: February 15, 2012

## Our Score: 4 out of 5 stars

Looking back at the 2000's first ten years of movies, it is unbelievable how many absolutely amazing films there were during this period. Well book is the perfect companion to assist with that task. Some of the pictures are not crystal clear but I would like to think that they were like that for artistic purpose. Not every shot is perfect freeze framed. The only disappointment and I think it is a little embarrassing even for Taschen is that within this fantastic book, it is also packed with typos. For example, it misspells “Benjamin Button” as “Benjamin WButton”. That is only factor really stopping this book from receiving 5 out of 5 stars.

It hard to look back in the 2000's because it doesn't seem to long ago but there were some really ground breaking movies in the last few years. To showcase some of them: “Avatar”, The Bourne Trilogy”, “Moulin Rouge”, “The King' Speech”, Everything from Pixar like “The Incredibles” and “Wall-E”, “Harry Potter” series and of course the “Pirates of the Caribbean” series. Those are just a mere few of my favorites. There are literally hundreds of movies showcased through these near 700 pages.

Each film in the book is not only put in the spotlight but also packed with great information including synopsis, film stills and production photos, cast/crew listings, fun trivia, technical information and of course actor and director bios. It honestly has everything you will need to learn about some of your favorite films or maybe even some that you might have missed in the last decade. After reading this book, I am very curious to check out Taschen's past installments of past decades.
